

QUALITY TRUNK FOR THE MODEL "A"

HERE is a new trunk that will prove popular with Model "A" owners. It is strongly constructed—guaranteed waterproof and dust-proof and makes an unusually attractive appearance.

The top and sides of the trunk are constructed from 3-ply basswood veneer. The bottom of the trunk (the part that is subjected to the greatest strain) is made from Terneplate.

The joint between the top and body of the trunk is equipped with a special interlocking edge made from rust-proof sheet steel. This interlocking edge contains a slot into which a tube of high grade rubber has been fitted, thus forming *an air tight joint.*

All straps on the trunk are of genuine cowhide leather—all fittings are chromium plated. In design, special care has been taken to make the back of the trunk conform to the contour of the car. This adds to its dressy appearance and attractively blends with the Model "A."

Price \$32.00, subject to dealers' usual parts discount.
